

I listen to Klove radio everyday as a source for music, news and commentary. There isn't another option for the type of music Klove broadcasts in the Salt Lake City Area. They also provide news with a unique perspective which cannot be heard on other stations. Klove provides family oriented programming which is difficult to find given the leniency the FCC has with some broadcasters with regard to pornographic language and displays. I think the FCC must have a political agenda against regional broadcast stations like Klove with this sudden and unjust ruling. I will be writing my congressman with the same comments.
